Technologies: Salesforce.com, SFDX CLI, Lightning Component (Aura), Lightning Web Component, Vue.js, Node.js, React.js, Express, Git/GitHub, PostgreSQL, Android, Flutter, Linux, Windows, MacOS

Spoken Languages: Chinese (Mandarin and Cantonese)

## Experience

### **EightCloud**

December 2018 – March 2019

Salesforce Admin/Developer

- Improved business performance with custom made Apex Classes and Triggers on complex logic.
- Developed custom test classes for code coverage to allow changes for deployment onto a production environment.
- Managed Salesforce Community through Community Builder with custom aura components.

### **Mason Frank International** – New York, NY

Aug 2018 – Present

Salesforce Business Consultant at Mason Frank Tech Academy

- Implemented custom Salesforce solutions such as data modeling and process automation.
- Developed skills in using the Salesforce developer console and SalesforceDX tool.
- Configured custom coded solutions through Apex, Visualforce and Lightning Components.

### **Research Foundation of CUNY** – Brooklyn, NY

Jan 2017 – Aug 2018

DOE Tech Support Intern at PS. 180 The Seeall Academy, IT Intern

- Provided assistance in use of technology equipment to teachers and students.
- Inspected technology that required replacement and communicated with DOE agents regarding replacement.
- Configured wireless devices to access the DOE network.

### **CUNY Tech Prep** - New York, NY

June 2017 – May 2018

JavaScript Software Developer Student

- Participated in a competitive full stack JavaScript training program that prepares students for careers in software engineering.
- Gained knowledge and practices in-demand technologies like React and Node + Express and processes for design, implementation, testing, and deployment.
- Worked on individual and team projects under the mentorship of a lab instructor.

## Projects

### **Brooklyn College Computer Science Club Page, Static Web Page**

Brooklyn College

Spring 2018

- Developed alongside two other students to create a modern web page for our client.
- Worked on pushing Vue.js as the main frontend framework over basic HTML and CSS.
- Created and deployed demo on Netlify.com and later consulted department server admin to route to club page.

### **EC Parking, Android Development using Java, Python**

HackNY

Fall 2017

- Developed an android application for communicating through Google Map services and the Twilio API, creating an accurate image of available parking spot within walking distance.
- Initiated a cloud-based tunnel for the Twilio API to test webhooks for their inbound and outbound SMS service.

### **Scan\_OnTheGO, Android Development using Java**

CUNY Hackathon

Spring 2017

- Developed an app alongside a team of 4 students to potential NYC tech investors.

- Created an image to text recognition application that directs recognized images to default mobile applications such as: phone dialer, email, and map.

## **Education**

### **CUNY Brooklyn College**

Bachelor of Science, Computer and Information Science

Aug 2013 - May 2018

## **Additional Certifications**

Certified Salesforce System Administrator ADM 201 (2018)

Certified Salesforce Platform Developer I (2019)

The Complete Salesforce Administrator Certification Course – Udemy (2018)
